## About Dermalogica

Dermalogica revolutionized the skin care industry when it emerged into the marketplace in 1986 with innovative formulations, which excluded common irritants, including SD alcohol, lanolin, mineral oil and artificial colors and fragrances. Jane Wurwand developed the products to better support the advanced curriculum she had developed a few years earlier for The International Dermal Institute, which she also founded. Wurwand led the company's growth from an idea to the world's most-requested professional skin care brand.

Dermalogica today is sold in more than 100 countries worldwide and trains over 100,000 professionals per year around the globe. Dermalogica products are available in select skin treatment centers on the recommendation of a qualified professional skin therapist in addition to the brand's concept spaces located around the world and online at [dermalogica.com](http://dermalogica.com). Dermalogica is made in the USA, with its global operations based in Carson, just south of Los Angeles. To learn more about Dermalogica, please visit [dermalogica.com.hk](http://dermalogica.com.hk).
